?: when I make chgs to index.html and then make chgs to about.html, can I just push the chgs from the VS code w my cursor in index.html? It seems that also covered the chgs I made to about.html. As a test, I then went to the VS code for about.html, placed my cursor in the text there, and pushed, and got the below messages. So it appears I can just push the changes from VS code with my cursor in index.html.

Can I push the changes with my cursor placed anywhere (in any section) of the VS code?

?'s for Suki: can you align the "Learn More" buttons at the bottom of the home page:

of them.	research and development.	chaos science, signal processing, and acoustics.
Learn More	Learn More	Learn More

Can you check the alignment of the below buttons; Curriculum Vitae looks slightly higher than "More about Diana":

Best Paper Award, "in recognition of outstanding excellence in a technical paper at the 2021 ASEE Annual Conference."
